

Dolphins Learning Log

Literacy

We have been thinking hard about the different traits of characters in stories this week. We thought of words to describe how the wolf from the 3 little pigs looked and behaved. We then wrote these into sentences.

We have begun our topic on winter poetry. We have thought of good describing words for our winter clothes and written sentences with similes in.

Geography

We kicked off our Ice and Snow topic by watching some footage of The Arctic and Antarctic. We located them on a globe and found the north and south pole. We started to think about what the landscape is like in these places.

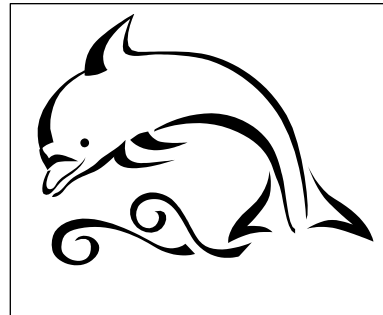

Maths

We have been consolidating our counting skills. We are quite confident at counting forwards but sometimes found counting backwards more challenging!

We have begun to work with 2D shapes to make pictures and repeating patterns. We have also been learning to describe shapes using words such as corners and edges.

Science

In science we did an investigation to find out if car would travel further if we gave it a big push. We had great fun running the cars down the ramps and sticking on stickers to show how far it got!

Phonics

We have been learning about the split digraph 'o-e' and 'u-e'. We have been looking for words in a story we were reading, writing sentences and we even watched a video of someone using theses words in sentences.

PSHE

We have been thinking about our friends. We worked together to make a list of qualities that make a really good friend.

WOW work!

Draw an Autumn picture.

P.E

In multi-skills we have started to learn bat and ball skills. We learnt to bounce, pass and throw a ball to ourselves. We also had fun trying to hit a target.
