

RE

We have been discussing what makes a place special to us. We have discussed why a church is special place to Christians. We have been learning about different things you might find inside a church and what they are used for. We will visit the local church after half term to further this work.

Science

We identified common garden flowers this week. We discussed the different characteristics of different garden plants. We also talked about how useful bees are for pollinating plants.

Music

We have been using the ukulele to play songs such as 'jumping flea' and 'thumb brush strum'.

P.E

We have continued to practice our cricket skills during multiskills. This week we played small games of cricket, taking turns to be the batter, bowler, wicket keeper and fielder.

Hambledon Primary School

Dolphins Learning Log

WB: 18-05-2015

DT

We have started to create our lighthouses for our Lighthouse Keeper's scene. Each child had a cardboard cylinder, which they ripped, scrunched up and stuck on red, white and black tissue paper.

WOW work!

Can you make a model of a beach?

Maths

We have been working on identifying and naming different common 3D shapes. Some children even went on a shape hunt, to try and find the 3D shapes around the school. We then categorised these common shapes, in terms of their faces. Finally, we learnt to read the time to the hour and the half hour on analogue clocks.

Phonics

We have continued to work on identifying different pronunciations of 'y'. We also looked at the different pronunciations for the letters 'ou'.

Literacy

We have been reading the story 'The Lighthouse Keeper's lunch'. From this, we have created our own disgusting sandwiches to feed the seagulls, focusing on describing our sandwiches using similes. We have also been writing a speech for the three seagulls, imagining they have just eaten the disgusting sandwich we created.
