

Science

This week we moved our flowers from the trays and planted them in the soil.

After that we wrote in our flower diaries to say what we had done.

Finally, we learnt what plants need to stay heathy.

P.E

We have been playing team games practicing our throwing skills. We used tennis balls, quoits and bean bags.

Music

We continued using the ukulele to play the 'thumb brush strum' and learnt to sing 'I can sing, I can shout' in a round.

DT

We have finished our lighthouse keeper's scene. We used tissue paper to create the sea and cliffs. We also used paper and card to create Mr and Mrs Grinling's cottage. Next week we will complete our scenes, by adding a pulley system, so that Mr Grinling's lunch can be passed from the cottage to the lighthouse.

Learning Log

WOW work!

Draw a picture of your favourite part of our trip to Southsea and write a sentence to say why it was your favourite part.

Fun Run!

We have been doing well in our training and can nearly do 20 laps of the field.

Maths

This week we have been focusing on money. We have determined how many 1p's, 10p's and £1's are in an amount of money. We have then been using this understanding to work out change.

Literacy

This week we have been creating an information book for Southsea. We have created: the front cover, introduction page, a 'what is fun to do in Southsea' page and a page about the rock gardens. We will continue this for some of next week.

Phonics

We have been looking at alternative ways to spell the sound /j/ and /n/. We have been including words with these sounds into sentences. We have also been trying to determine which words are real and which are nonsense words.
