

SHARKS' LEARNING LOG

w/c Monday 29th June 2015

Literacy

On Wednesday, we wrote our own kennings poems linked to our Science topic on the body. We used a range of information books to research scientific vocabulary that could also be included. On Friday, we worked in groups to consider how we classify texts particularly short stories.

Maths

Our focus in Maths this week was data collection. We took body measurements from one another and created a table to collate the results. Using this information we made a bar graph to display the data. We then made statements related to the graph.

Science

In Science this week, our focus was on muscles. We talked about our types of muscles and how we used them on our trip to Rock Up. We created a labelled diagram to show the muscles stretching and contracting.

RE

In RE this week, we compared Muslim and Christian prayer rituals, preparing us for a PowerPoint presentation.

Trips

This week, the children enjoyed participating in two off-site visits. On Monday morning, we went to 'Rock Up', in Whiteley. After attending a safety briefing meeting, the children were each shown how to put on their harnesses. Then it was time to climb! With over 20 different climbing walls, the children were kept busy for an hour, and were certainly very quiet on the minibus going back to school!

We also all enjoyed our visit to the Anvil Theatre in Basingstoke on Tuesday for the Primary Music Prom. The children were very well behaved on both trips and were a credit to themselves and the school.

ICT

Using the laptops, we used 2calculate to display the data from our maths lessons.

PE

In tennis this week, we practised passing to one another with a focus on holding the racket with two hands. In athletics we have been practising the changeover in a relay race.
