

### Art / Design Technology

The children made a dinosaur using our favourite resource...Yes you guessed correctly. They turned a paper plate into a dinosaur.

### Science

The children went looking for Earthworms, observing their length, thickness and how they moved.

They then labelled a picture of the worm choosing the correct word to put in the space. They then discussed what they eat and how they tunnel in the soil.

### Music

The children were back to playing their recorders this week, playing the notes they had previously learnt along to some tunes.

### PSHE/RE

Our circle time this week was about encouraging the children to take it in turns to talk about the different types of clothes people wear, focusing in on people who help us, for example, firemen and women, police officers, Military personnel, doctors and nurses and why they wear a particular uniform.

### Mathematics

The children have been learning to use the word capacity and what it means. They have been using the symbols for more than and less than. We have been having another look at simple multiplication, counting in 2s, 5s, and 10s and working out how many of something we will have if we have several groups of the same number.

## Turtles Class Y1 Learning Log Wk./B 9<sup>th</sup> May 2016

### English

We are looking at a new story this week. Meerkat Mail. We are using it to support our English work, sorting and sequencing sentences and learning about postcards and how to write one. During phonics we have been sorting words that use the alternative ey, ch and j sound.

### PE

Striking skills were developed during multi skills (football) and they used tennis rackets to control a ball on the ground and lightly hit a ball to a partner extending this to hit a ball with control and direction during Tennis.

### Topic – History

During our topic this week we focused on Meat eating dinosaurs. We also learnt that some of the biggest dinosaurs to roam the land were Sauropods. I will let the children tell you all about them.

### Computing

We have been using laptops to support our guided reading and we continue create pictures of dinosaurs on the class computers using 2paint.
