

Art / Design Technology

During Art this week the children designed their own dinosaurs. They had to think about the colours it might be, how it might protect itself and what it might eat. They then had to give it a dinosaur name. The children made a really lovely job of these and they are now on display in the classroom.

Mathematics

We started our maths this week by saying our number bonds of 10 and trying to think of them as quickly as possible. They had to show the bonds they made on grids of ten blocks. The children are becoming more confident with this. They then used this knowledge to help them with some addition work.

Topic – History

We started our new topic this week with the arrival of two unusual eggs which we believe to be dinosaur eggs. We are waiting for them to hatch and have been trying to predict what dinosaurs may appear. The children have made their own predictions and drawn pictures before writing facts they knew or using books and the internet to help them find facts about

Computing

We have used computers this week to support our reading and I have helped some of the children to use the internet to find out information about dinosaurs.

Turtles Class Y1 Learning Log Wk/B 11th April 2016

Science

This week in Science the children were asked to see what they could remember from their light and dark topic before starting a new one. They went on a mini-beast hunt, recording what they found and where they found it.

PE

We practised some ball skills in our class PE session and enjoyed our Multi skills session on Thursday with the coach, developing our striking skills.

English

We have spent this week planning and then writing a short recount of what we did during the Easter holiday. They have certainly been busy children with some very exciting adventures taking place, although Easter egg/bunny hunts were top of the list!

We have also been correcting sentences, putting the capital letters and full stops in the correct place and adding 'ed' to words to develop our knowledge of past tense in writing.

We are currently sorting words that have y in them thinking about the alternative pronunciations.

Music

The children enjoyed their music session with an introduction to the recorder.
