

### Art / Design Technology

We have started to create our faces by drawing our face on card then shaping and sticking string to our drawing. This was quite a challenge as we got very sticky but the children did very well.

### Mathematics

We have been partitioning 5 using cubes of two colours to find different ways of making 5, the children then recorded their findings as sums using the symbols + and =

### Topic – History

We finished looking at the Royal family tree and started thinking about how our own would look like.

### English

The children used their alliterative titles to base their stories on. They made notes about some of the things they wanted to include in their actual stories and used these to write their stories a bit at a time over a few days.

In phonics we reinforced our learning of 'ea' 'ey' and started looking at the new sound 'oy'

## Turtles Class Y1 Learning Log Wk/B 5<sup>th</sup> October

### Science

The children recorded their predictions and findings of which they thought would be the most waterproof. We were interested to see if our predictions had been correct.

### RE/PSHE

During Circle time we talked about the things we liked about school and some of the things that maybe worried us about school. The children were very good at sharing their thoughts and suggesting ways of trying to support each other.

### Music

During Music the children developed their starry music and following conductor's signals and encouraging each other whilst singing solos.

### PE

During their PE lesson with the coach the children continued to work on their individual target accuracy skills through throwing and kicking a ball.
